

Although we have chosen to use a caricature of Dr. Carol Sue Rosin gathering up weapons to prevent them being used in space, the reality behind the image is no laughing matter. This is because as Dr. Carol warns, “Many of us have been talking the peace process for decades. However, many have also been talking about expanding the war machine into space under the lie that such a system would protect us. This weapons system is called the Strategic Defense Initiative, SDI, “Missile Defense,” “National Security,” a “Global Protection System,” or what some call the “Star Wars” weapons program.

The stated aim of this weapons program is to dominate and control everyone and everything on earth and in space from space by a few. Throughout history, misinformation, half-truths and out and out lies have been perpetuated to rationalize the need for one war to occur after another. Fortunately, more and more people are seeing through this and realizing war serves no one but, to use an old term, war profiteers. Today, this same mentality is being thrust on us again, only instead of the Red/Communist threat or terrorists; the rationalization is that we need to protect ourselves from Extraterrestrial beings, bent on conquering and enslaving us.

First, the Extraterrestrials or I prefer Cosmos Cultures are obviously not hostile, because we are still here! Second, there is zero evidence of any hostility coming from Cosmos Cultures! Do not believe this one! Many highly credentialed people have recently come forward with personal experiences to confirm that they know beings from various dimensions and planets. They emphatically state that these beings have been visiting our planet for decades and are not hostile. Of course, xenophobia (fear of strangers) has been carefully cultivated for centuries to keep us separated. To some degree it is understandable that the atmosphere of fear is so strong—we live under continual threats (real or imaginary); betrayals, greed and corruption. However, we are evolving, which most of us know is essential for our and the planet’s survival.

This evolution is predominantly conscious, which means we have got to act and think differently. Again, fortunately more and more are realizing this. For instance, more people using reason and logic to conclude that with the kind of technology that allows Cosmos Cultures to travel here from light-years away, if they did have sinister motives and wanted to invade and conquer us they would have by now, and there would be nothing we could do to defend ourselves. Besides, our “defense” should now be based on the environmental and health catastrophes facing us all—we don’t need to spend another dime on defending ourselves with weapons.

This is the time for all of us to come together and we have to now not just envision it, but really believe it. For those who are reading this, I say WE can begin this process by realizing that none of the Cosmos Cultures are hostile. Using the principle of quantum theory it is not enough to just “believe” it; we have to “KNOW” it. Then maintain that “knowing” and do not let anyone cause you to believe anything else. Because of the suffering and despair, some immersed in the day to day business of just surviving won’t be able to participate. Nonetheless, they are a part of the mass consciousness and when enough of us “think” this way everyone will be helped. This is because of the effect your focus will bring.

There is a different frequency that some of us are communicating in that has made it clear that the sinister old paradigm system is being run by humans. What a relief, if humans are causing this then “humans” can fix it. In other words it is up to us to change the atmosphere of fear and despair by changing the way we think, (the real meaning of the word repent). Nonetheless, many people are more interested in a practical way of changing the system. We are seeing this with the Occupy movement; again I am in no way trying to start a movement; however, “Occupy” has clearly demonstrated what can happen when people get together to change the system.

There is a feasible way to change the whole game, right now; **Treaty on the Prevention of the Placement of Weapons in Outer Space** (Revised Russia-China 2008 proposed Treaty: Now ready for leaders to sign.). It authors believe that it will get us out of this mess; out of the dangerous, too costly, destabilizing, polluting, war and weapons mindset and industry that is causing so much unnecessary suffering and destruction—and that can be transformed so easily. After all, basically all the Treaty’s authors are asking is that the mandate to weaponize space be removed. For those motivated to help more here are some suggestions of how you can help and what we hope to achieve:

If you live in a country outside of the USA, you can contact us through [www.peaceinspace.com](http://www.peaceinspace.com) to be part of the plan of action to get this Treaty signed and ratified into law to change the whole game on this planet. We are making plans to take strategic steps to reach the first NINE world leaders, prime ministers and presidents, who we know will sign and ratify this most unique agreement EVER, a true milestone of our time, because it is time!

Pure economics and “fear” are main causes of the war game continuing. Nothing good comes from conflict. It leads only to greed and corruption, which causes suffering and destruction and economic problems as conflicts escalate into wars. In this modern day when we are supposed to have become more civilized more and more countries have been drawn into this wasteful dangerous expensive war game. Now, that same war industry, which contrary to popular belief does not make anyone more secure, is intent on

escalating this old paradigm into space. Unfortunately, they will succeed unless we act quickly to stop and transform it. The research and development, R&D of the Star Wars program has already cost billions and if expanded will cost more trillions of dollars in an already distressed and collapsing economy. It is time to stop feeding the insatiable 'war machine', which only supports the status quo.

The Treaty presents a politically, technologically, economically, socially, psychologically and spiritually feasible vision and method that can replace the war industry and mindset! This is when consciousness shifts into a new frequency based on real peace and love, health and harmony with nature and each other. I believe the new frequency will prevail and foster a commitment to the exploration of the universes together in a way that will provide unlimited benefits and opportunities for all. As a result children everywhere will experience an exciting future that includes a healthy respect for all cultures on earth and in space. We can choose to allow the continuation of wars or to evolve and transform the war mentality and industry into one worthy of our time.

- WE ARE THE ONES to get this done.
- This is the step we need to take!

Treaty on the Prevention of the Placement of Weapons in Outer Space (Revised Russia-China 2008 proposed Treaty: Now ready for leaders to sign.) was co-authored with Dr. Carol Rosin, Apollo Astronaut Dr. Edgar Mitchell; Commander Will Miller, US Navy (Ret.); Dr. Abe Krieger, 37 year Boeing executive; Dr. C.B. Scott Jones, military/intelligence and Senior Advisor to Sen. Claiborne Pell; supported by the Hon. Paul Hellyer, former Minister of Defense of Canada. The Treaty is posted in several languages with bios on <http://www.peaceinspace.com> This Treaty is a project of P.E.A.C.E. Inc., the Peace and Emergency Action Coalition for Earth, a 501-c-3 founded by Dr. C.B. Scott Jones.

To sum up then, the Treaty ratification is the step! This Treaty tells a unique story that has never appeared before in an official document. It incorporates the best intentions and language in other treaties and this one tells the whole TRUTH. It talks about investing in the commercial, entrepreneurial, and new kinds of jobs and training programs not only for civilians but also for our military personnel. Once this Treaty is ratified into law our military will be dedicated to solving earth's most urgent and potential problems on our planet. Moreover, this is the first official document that acknowledges the wisdom of the Indigenous Cultures who teach us about being in harmony with nature. Just think of the intelligence and information that we will all receive once the ban on all space-based weapons is acknowledged and the Cosmos Cultures are officially invited to visit us so we can all share what we know. The Indigenous and Cosmos Cultures are designated to be Parties to this Treaty; of course it is the UN Member Nation leaders who are the Signatories. It is imperative to get the Treaty signed and ratified into World law before the usual war-making enemy-fear beliefs spread and before a momentum of funding and vested interests is put into place that could make the weaponization of space impossible to stop.

This Treaty will advance our Human Race into a new level of existence, bringing real Peace, Justice, Freedom, Respect and Prosperity with unlimited benefits and opportunities for everyone.

This is the start and the pivotal moment in time when the consciousness shifts and time is of the essence!
