

## SIXTH REVIEW – Section 8

- Some investigators believe that there are religious writings that report of two separate angelic rebellions.
- Angels have been depicted in various forms throughout history, from cutesy cherubs to awe-inspiring, huge beings of light but always in human form.
- Angelic beings had once been corporeal or human beings, and through enlightenment raised their vibration to become light beings.
- Sophia and the Christ transformed Sophia's emotions into the four elements of earth, air, fire, and water.
- Sophia and The Christ caused the creation of the Creator/Demiurge or the God of the Old Testament.
- The Angels were made of the same elements as human beings, only in a more refined, therefore lighter manner.
- Because Angels are of the Soul Plane they are endowed with souls.
- The Astral Plane had been created with the Soul Plane as a means to teach the Life Principle's souls in between incarnations how to access the Divine Spark.
- When the Lemurians genetically altered the Cro-Magnons, The Creator only divided what was already there (Astral Plane).
- After the Human Race was genetically manipulated, initially to correct the problem, The Creator reduced the life span and created three separate levels in the Astral Plane, Kama Loka, Devachan and Avichi, which acted as barriers to separate the purer souls and forces from the baser ones.
- For so many people to believe in angels there must be some substance to the belief.
- The Old Testament is full of angels interacting with humanity, Jacob's Ladder (Genesis 28:12) and the two angels sent to warn Lot (Genesis 19:1) are just two examples.
- Not all Angels are equal.
- The Demiurge/Creator did not create all levels of Angels.
- Before the Creation or evolution of humanity, the lower layers of the angelic realm did not exist.
- When the Demiurge/Creator was forming the Soul Plane, he brought forth creative (archons) and administrative (astrological) powers.
- The Administrative powers were identified with the suffix "im", such as Elohim, Seraphim and Cherubim.
- The Archangels were formed from early Humanity, before the "fall."
- As Humanity evolved, Christ-like teachers taught them how to raise their vibration. This is how humans became angels.
- The angels were needed to interact with humanity on a physical level. Because they were made from the same elements, when the Demiurge wanted a message given to a person, he could send a messenger (angel) to the person, all the angel had to do was temporarily lower or slow down his or her vibration to the same as the person to be seen and heard.
- The angelic realm is androgynous.
- When an angel interacts with a human being the angel will appear as either male or female.
- Is the doctrine of beatification reflecting human beings becoming angels?

- All spiritual beings, along with the human race, have free will, and because they are beneath the Veil, they are of a dual nature.
- There is a Jewish legend that says the Angels were jealous when Yahweh (the Creator/Demiurge or the God of the Old Testament) asked Adam to name the animals.
- Angels are capable of more than one “human” emotion.
- The Scriptures say some beings of the angelic realm exhibited the emotions of pride and lust.
- Every ensouled being is linked through the Soul Plane.
- When the Human Race, with its Divine sparks was altered by an alien race, the entire consciousness of the Soul Plane was affected.
- Just as the consciousness of every human being is affected by the mass consciousness, every entity beneath the Veil is also affected.
- When humanity became infused with the shadow side of the universe, because of the axiom, “As above so below, as below so above,” the Soul Plane also became afflicted.
- Because every being beneath the Veil has free will, the angels also have to choose urges to which to adhere, self or selflessness.
- Some members of the Soul Plane chose self, which has been recorded as the angelic rebellion.
- There are several writings, which state the rebellious Angels, were given corporeal bodies.
- Just as the Christ, with the Holy Spirit, raised or speeded up the cells of Jesus’ body, the “fallen angels” affected the opposite by lowering or slowing down their vibrations.
- The “sons of God” (angels) lusted after the “daughters of men”.
- The Archangel Lucifer was guilty of pride.
- Every being of the Soul Plane is of dual nature.
- Every ensouled being is linked through the Astral Plane.
- The “fall” was a euphemism for the genetic manipulation of Cro-Magnons.
- Scholars maintain that the Gnostics taught that The Christ had descended into Jesus without the Demiurge’s knowledge.
- There were many different Gnostic sects in existence during the 2nd Century of the Common Era, and the one we were led to were the Valentinians.
- The successor to Valentinus was Ptolemaeus.
- Ptolemaeus wrote a famous letter to a Christian woman named Flora. The Law ordained through Moses has not been understood by many persons. The whole Law is divided into three parts, legislations of Moses, of the Elders, and of God Himself. The Law of God Himself, is in turn divided into three parts; The pure legislation not mixed with evil, — which the Savior came not to destroy but to complete; — next the legislation interwoven with inferiority and injustice, which the Savior destroyed because it was alien to His nature; and finally, the legislation which is exemplary and symbolic. The Law of God, pure and not mixed with inferiority, is the Decalogue, (The 10 commandments). These contain pure but imperfect legislation and required completion by the Savior. The Law interwoven with injustice, laid down for vengeance and the requital of previous injuries is exemplified in “an eye for an eye and a tooth for a tooth, and a life for a life. Jesus destroyed this part of the Law while admitting that it came from God.
- The exemplary part of the Law is ordained in the image of spiritual and transcendent matters. As in offerings, circumcision, the Sabbath, fasting, Passover, unleavened bread,

and other similar matters. Since all these things are images and symbols, when the truth was made manifest they were translated to another meaning.

- The Savior wanted us to be circumcised, not in regard to our physical foreskin but in regard to our spiritual heart.
- Paul the apostle shows that the Passover and the unleavened bread are images.
- The first part (10 Commandments) of the Law of God was completed by the Savior, in the commandment forbidding anger, desire, and swearing.
- The second part of the Law of God was entirely destroyed. For ‘an eye for an eye and a tooth for a tooth’, interwoven with injustice was destroyed by the Savior through its opposite “...turn the other cheek...”
- The third part of the Law of God was translated and changed from the literal to the spiritual.
- The Law was not ordained by the perfect God Himself.
- The Law was not ordained by the Devil.
- The Legislator must be someone other than the perfect God or the Devil.
- The Legislator or Law giver is the Demiurge and maker of this Universe and everything in it.
- The perfect God is good by nature.
- The Devil is evil and wicked, characterized by injustice.
- The Demiurge is neither good nor evil and unjust but can properly be called just.
- There is only one ungenerated Father.
- The substance of the adversary is corruption and darkness, for he is material and complex.
- The substance of the ungenerated Father of all is incorruption and self-existent light.
- The Valentinians did not see either The Creator or His Creation as evil, which was the position of many of the Gnostic sects; such as the Manicheans.
- Everything beneath the Veil is essentially vibrating energy or operating at specific frequency ranges.
- The astral plane, of which heaven is a part, vibrates at just a little higher rate than the Earth plane.
- The astral plane is divided into three subjective levels, which the ancient esoteric teachers named Kama Loka, Avitchi and Devachan often depicted one above another. All three levels are collectively called the Astral plane.
- The Church taught that there was heaven, purgatory, and hell.
- Devachan represented the highest level and would equate to the Greek concept of Elysian Fields or the Church’s Heaven.
- The reverse of Devachan is Avitchi, which would equate to the Greek concept of Hades or the Church’s Hell.
- Kama Loka could be conceived as equal to the concept of Purgatory.
- When a spiritual entity through free-will choice begins to slow down or lower their vibration, they sink lower in the Astral plane. Eventually they slow their vibration to such an extent that they can no longer remain in the subjective astral plane and have to take on corporeal bodies in the objective Earth plane.
- The experience in the Astral plane is determined by an individual’s mental conception. The various levels should not be seen as locations for Divine reward or punishment.
- The spiritual realm is not stagnant.

- According to De Laurence ‘...All are destined to attain perfection by passing through the different degrees of the spirit-hierarchy.’ This is achieved by their incarnation in a physical body, which is imposed on some of them as a kind of penance and for others as a ‘mission.’
- It is through living that the spirits, like us, achieve ‘absolute perfection,’ which Mr. de Laurence describes as ‘a sort of filter,’ the goal being to purify the spirit to enable it to return to *Great Spirit-Mind/God*.
- All kinds of spirits are constantly ‘in relation’ with us. The ‘good’ ones are always trying to guide us on the right path. The bad ones tempt us to evil; it is a pleasure for them to see us fall, and to make us like themselves.
- The communications of spirits with men are either hidden or superficial. Hidden communications are made through the good or bad influence they exert on us without our being aware of it; it is our duty to distinguish by exercise of our judgment, between the good and the bad inspirations that are thus brought to bear upon us.
- H. P. Blavatsky believed there were two entities living in each of us, saying that Man was, and still is, the vehicle of a dual spirit in him—good and evil.
- The full consciousness of the individual sentences himself or herself to an undetermined time in the Avitchi section of Kama Loka or Hell of their making. Just as the soul of the person who has lived a good life experiences all their heart desires; the depraved soul will equally give themselves their just desserts, in whatever Hell they deem appropriate.
- Souls after death create an environment where they repeat the same destructive behavior patterns over and over again.
- Whenever tragedies or catastrophes occur people are confronted with the apparent randomness of the event.
- Many survivors of the attacks on 9-11 and victim’s families wonder where *Great Spirit-Mind* “God” was on that dreadful morning and ask why He did not stop it.
- In interviews survivors of the Holocaust relate that the Reason the Jews did not fight the Germans and appeared to go quietly, was because they had faith, and fully believed that *Great Spirit-Mind* or God would save them.
- Church doctrine teaches us everything that happens is God’s Will, because God (*Great Spirit-Mind*) is Omnipotent (all powerful), Omnipresent (present everywhere), and Omniscient (all knowing).
- Another popular saying is “Everything that happens happens for a reason”. This saying is connected to the former, only it allows that there may be other forces involved. Either way, this makes us helpless pawns in the game of life and death.
- Anything that creates fear, hatred, and or division is Never of Divine origin.
- If *Great Spirit-Mind/God* is not responsible for everything that happens, then who is? Many religious minded individuals would answer “Satan” or the “devil”. But that implies that *Great Spirit-Mind* is indifferent to the plight of His children, which brings us back to the question “Why does *Great Spirit-Mind* or God allow suffering?”
- The Book of Job should not be taken literally, it is an allegory, which hides a deeper meaning, and the main characters in the allegory are Archetypes.
- One of the Seven Keys of Interpretation is that there are seven interpretations to all Scriptural allegory.

- The wise sages had ingeniously mixed the symbols and creeds of their ‘religious philosophies’ so affectively that the true meaning could only be discerned by combining the information of all seven keys.
- The secret of the lowest key, the physiological, was lost its sublime purity when the sacrilegious discovered the key.
- H.P Blavatsky names six Keys in a very obscure way in the second volume of her masterpiece of esoteric teaching, the Secret Doctrine.
- The six keys are physiological, anthropological, psychic, astronomical, theogony, and anthropogony.
- Theogony is the origin or genealogy as told in myths - this key could be understood as also mythological.
- Theogony is the key used to reveal the information of the lower gods or creators.
- The Book of Job was written before the incarnation of The Christ, and so the Old Law of “Justice”, as in an “eye for an eye” was in affect.
- The situation in the Book of Job is due to genetic manipulation of the Human Race.
- In order to interpret the allegory of Job we first need to identify which Archetypes are being represented.
- Satan in the allegory should be seen as Macrocosmically representing All inhabitants of the Soul Plane, The Law of “an eye for an eye”, Linear Time, the Gnostic Limit, and the Wheel of Necessity. This Archetype is represented by card 10 – The Wheel of Fortune.
- The “Lord” needs to be seen collectively as representing The Creator/Demiurge, Astrological forces, Archons, and Archangels, which is typified by card 4 – The Emperor.
- Job represents the Life Principle, Spiritual Soul, and collectively the Human Race, signified by card 0 – The Fool.
- Jobs friends represent the collective counterfeit spirit in individuals and is represented by two cards, 1 – The Magician as the lower ego, and card 15 – The Devil as the counterfeit spirit or false self.
- From a Macrocosmic perspective the allegory represents the condition of the Soul Plane because of the Lemurian genetic manipulation.
- Before the “fall” the purpose for Creation was to redeem the lost essence (emotions) of Sophia.
- Our Solar System was isolated and chosen as the arena for the Life Principle and Mind (Nous) to transmute the elements (Sophia’s emotions).
- The inhabitants of the Soul Plane were contaminated by the lower emotions and because of free will, became corrupted and part of the problem.
- The allegory of Job is reflecting the contamination of the Soul Plane with Satan (The Law or the Wheel of Necessity) challenging *Great Spirit-Mind* (The forces of the Soul Plane) to a “Spiritual duel”.
- After the “fall’ the inhabitants of the Soul Plane became vulnerable and needed redeeming.
- The forces of the Soul Plane are suspicious and skeptical of Humanity’s faithfulness, and wish to constantly try the Human Race.
- The deeper message of the Archetype represented by the “Lord” in the allegory of Job is in the “Lord’s” apparent abandonment of Job.
- The “Lord” represents not only The Creator/Demiurge, but the Archons, Astrological forces, and Archangels.

- In the allegory the “Lord” tells Satan that He believes Job will remain faithful no matter what Satan does.
- The key to understanding that “the Lord’s” action in the allegory symbolized The Creator/Demiurge’s Compassion is in the effect Job’s faithfulness has on Job’s friends.
- In the allegory Job’s friends represent Microcosmically the counterfeit spirit and lower ego in individuals; Macrocosmically Job’s friends represent the figure of Satan.
- Satan’s Archetypal role is taken up Microcosmically by Job’s friends who encourage Job to curse the Lord.
- The most important message of the allegory is: the “Lord” telling Job’s friends that they can only avoid his “wrath” by Job praying for them.
- Macrocosmically Job represents the entire Human Race.
- The Creator/Demiurge (the Lord) redeems all the inhabitants of the Soul Plane (Satan and Job’s friends) by the example the Human Race (Job) shows in maintaining faith through life’s testing.
- The Human race (Job) is redeeming the Soul Plane (Satan and Job’s friends) through the example of their lives.
- Mahatma Gandhi was able to cause the powerful British Empire to grant India independence through his example of non-violent resistance.
- The story of Job is universal.
- Satan represents the counterfeit spirit or false self.
- Job represents the Human Soul.
- At the Microcosmic level Job represents the Spiritual Soul because the development of the Human Race has reached the Spiritual Soul level.
- Archetypally Job is represented by card 0 – The Fool.
- Microcosmically because Satan represents the individual counterfeit spirit, he is Archetypally characterized by card 15 – The Devil.
- At the Microcosmic level the “Lord” characterizes the first stage of the Higher Self, represented by card 5 – The Hierophant. The Reason we say the first stage is because of the presence of the emotion of anger (wrath).
- Microcosmically Job’s friends represent the different aspects of consciousness, which acts almost like prosecutors of the human being’s failings.
- Eliphaz, Bildad, and Zophar could be seen to embody the individual intellect, (card 1 – The Magician) memory (card 2 – The High Priestess), and imagination (card 3 – The Empress).
- Elihu like the Macrocosmic interpretation signifies Satan or the counterfeit spirit in his lower aspect, only in the Microcosmic interpretation Elihu embodies the human aspect of Inductive Reason, which is represented by card 4 – The Emperor.
- The main message of the Microcosmic interpretation is found in Job’s “submission to God” representing the Spiritual transformation of the Spiritual Soul through the Higher Self.
- The transformation of the Spiritual Soul by surrendering to the Higher Self results in the individual changing their consciousness.
- In the allegory of Job “heaven” represents the realm between life and death, commonly referred to as the After-life.
- The After-life on the four planes of existence corresponds to the Kama Loka of the Astral Plane.

- The concept of a place of eternal punishment has retarded Spiritual Evolution for nearly two millennia.
- The belief in an afterlife was widely spread throughout the world, as in the Elysian Fields or Hades.
- Kama-Loka, translates principally as ‘the world of compensation.
- Kama Loka and Devachan’s ‘atomic principles’ are a good deal ‘finer’ than our material world, and as such, these particles ‘interpenetrate physical matter.
- Although we can’t see it ‘the eternal flames of hell are now in our very midst.’ The reason we can’t see this realm is because we are on another vibratory frequency.
- It is in the lower Kama Loka, or ‘lower division of the astral plane,’ we find the ‘elementals...’
- Every single thought, emotion, and action had consequences on some plane of existence.
- It was in the lower levels of the astral plane or Kama Loka that the lowest and basest of man’s creations exist.
- After death our seven principles are literally pulled apart with only the higher principles going on to Devachan. All lower or negative aspects of the human being get sloughed off in Kama Loka, leaving the living consciousness to go to the higher planes.
- Nowhere does Genesis mention Satan or the Devil. It is just a lowly serpent, which “God” condemns to eat dirt as a punishment and be humanity’s enemy.
- Satan was not an individual; rather it was anyone who was sent by Divinity ‘for the specific purpose of blocking or obstructing human activity.
- The root stn means ‘one who opposes, obstructs, or acts as adversary. The Greek term diabolus, later translated Devil, literally means one who throws something across one’s path.
- The Satan often had humanity oppose God.
- Martin Luther, founder of Protestant Christianity, denounced as ‘agents of Satan’ all Christians who remained loyal to the Roman Catholic church, all Jews who refused to acknowledge Jesus as Messiah, all who challenged the power of landowning aristocrats by participating in the peasant’s war, and all ‘Protestant’ Christians who were not Lutheran.
- The Renaissance Age was a time of struggle for Reason where religious fanaticism often over-rode Scientific discoveries, such as Galileo’s discovery that the Earth was not at the center of the Universe.
- The treatment of Galileo is probably the most obvious representation of the imposing of injustice by religious authorities.
- The injustice Satan perpetrated on Job in the allegory in the Book of Job Microcosmically represents Predestination.
- Many people debate the accuracy of the term Predestination because it denies Free Will.
- Free Will is sacrosanct.
- Both Free Will and Predestination apply in the realm between Life and Death.
- Not all Souls are at the same level in Spiritual Evolution.
- The Soul Plane is pure consciousness.
- In the After-Life you do not have a physical body, which means you do not have eyes. Instead you “see” in terms of energy, frequency, and consciousness.
- Instead of “seeing” a physical world in the After-Life all you see are multiple colors of vibrating energy, which “reflects” the thoughts and emotions of the world.

- The world as we know it only exists on the physical plane, because we collectively create it moment by moment.
- There is no such thing as Linear Time, no present, past or future, only now.
- When the Souls “look” at the world they “see” only one moment.
- The emotions cannot be transmuted until they are experienced.
- Before incarnation the Souls seek out the “spikes” in frequency through color and intensity and choose to be present at that point in time, in order to help transmute the consciousness.
- Everyone who lost their lives on 9-11, on a Spiritual level, did so willingly.
- Despite advanced Souls freely choosing (Free will) to fulfill their chosen path (Predestination) once they were born, the individuals have absolutely no memory of their decision prior to incarnation.
- Powerful events like 9-11 cause “spikes” in energy, frequency, and consciousness.
- Advanced Souls choose to be present at the time of “spikes.”
- Whenever a person transmutes their emotions, they help change the world.
- Suffering generates emotions that release the Spirit or Divine sparks.
- No Soul leaves the Earth (dies) until they are Spiritually ready.
- The huge Hitler rallies generated spikes in the emotions of fear, grief, ignorance, and confusion.
- From an energetic and frequency perspective the Hitler rallies spiked in the colors black and red. Scientists tell us that color and sound are frequencies.
- Literally hundreds of thousands of people were generating the same thought and emotions.
- Because Hitler was using the frequency of sound (in vitriolic speeches) in the Soul Plane or After-life this would cause multiple “spikes” in consciousness, and thousands of Souls would choose to be present to assist in the transmutation of the energy.
- Another emotion being generated at the Hitler rallies was hatred, the most destructive emotion of all.
- Hatred is the exact opposite of human love.
- Hatred is a direct result of the genetic manipulation.
- The presence of hatred in the world is the cause for most of the atrocities, and can only be overcome with altruistic or selflessness.
- During WWII there were many instances recorded of selfless acts by individuals, which affected many people.
- The “spike” in consciousness of the worst of Humanity, is equally offset when the Human Race is at its best.
- A perfect example of a “spike” for good is the over 200,000 people that gathered to hear President Barack Obama’s election speech.
- From an energetic and frequency perspective, we would see multiple “spikes” of color. The colors this time would be a blending of red, blue and white. This resulted in a cloud of purple and pink.
- The purple represented the equilibrium of red (Republican) and blue (Democrat), but it was the generation of the color white which made this moment so powerful, because the white represented the union of all the colors and hope.
- As in the Hitler rallies, the frequency of sound was also in play. Only this time Barack Obama’s words generated peace, love and hope.

- If you allow yourself to consider the emotions you felt when the United States of America truly became a union again then you will be able to understand the moment in terms of energy.
- As you shift your perception, your Deductive Reasoning will do the rest, and you will begin to change the way you think.
- Everything is possible in the “presence of peace.”
- The goal of the Initiative is to transform the hearts and minds of individuals, and therefore transform the world.
- When an individual has transformed the heart, they become compassion and experience the peace of God, which passeth all understanding.
- All sins shall be forgiven unto the sons of men.
- The individual’s soul created the reality it felt it deserved.
- Within the septenary man there are seven principles, the highest is the same substance as *Great Spirit-Mind* or “God.”
- It is our higher principles that judge us.
- Blasphemy of the Holy Spirit or Ghost is when, due to a person’s actions in this life, he or she forces the higher principles to separate before death.
- At the time of death the individual cannot pass any higher than Kama Loka.
- What’s left of the soul; i.e., the lower principles, which include the personality, with all its thoughts and memories, often remains bitter and angry at the Human Race. They often spend an eternity searching for weak-minded individuals to continue their depraved lives vicariously.
- When a spirit of an individual is forced out of the body by capital punishment, the person of the criminal remains exactly the same as it was prior to execution.
- When the executed soul reaches the other side, it is usually scared and angry because more than likely it is not highly evolved and is ignorant of spiritual laws.
- In most cases, such a soul roams endlessly throughout the lower astral world with other like-minded souls.
- The separated souls are tormented and often carry a mind-set of anger and hatred.
- The separated souls often seek revenge for their untimely deaths and search the earth for weak-minded humans whom they can mentally influence to kill or hurt others.
- In the last two decades or so, the buzzword of the day, among spiritual people has been karma.
- The length of time spent in either Kama Loka or Devachan is determined by the strength of the impulse.
- To understand how Astrology works, it will help to think of space as a sheet or plane of energy, with the spheres or planets of the solar system as balls creating depressions in that sheet. As the planets or balls move around each other, their respective positions affect the sheet or plane of energy.
- When a baby is born as he or she crowns at birth the soft spot at the top of the head is exposed.
- Because a new born baby’s skull is not fully formed, exposing the soft spot in effect exposes the brain to the energies of the planets on the sheet.
- Exposure to the planets is the most powerful event in a human beings life, because this imprints the brain with the propensities for this incarnation.

- Numerology set the external vibrations by choosing the child's name.
- Astrology imprints the inner consciousness by the positions of the planets in respect to each other.
- These very specific Astrological energies affect everything in the baby's life, from personality to what career he or she will choose.
- It may also help to visualize an imaginary circle with a newborn baby at the center of the circle.
- Around the baby in this imaginary circle, positioned are all the planets and constellations. This is what astrologers call a natal chart.
- Astrologers divide the chart or imaginary circle into 12 segments, which they refer to as houses.
- To each of these houses is assigned a sun-sign or zodiacal sign.
- The position of the Sun determines what sun sign the baby is born under.
- Each of the twelve houses rules or influences various elements of our lives, such as finances and health.
- We try to determine our life path before we incarnate but once we are born then free will takes over.
- Paracelsus believed whatever the stars can do we can do ourselves, because the wisdom which we obtain from *Great Spirit-Mind* or "God" overpowers the heaven and rules the stars.
- Paracelsus warned, "Whatever comes from the 'spirits' is sorcery. Such spirits are false, and we do not believe in them; but we believe in the power of that wisdom which rules heaven, and by which all the mysteries of nature may be known.
- Sorcery has been called magic; but magic is wisdom, and there is no wisdom in sorcery.
- It is not enough to possess the ten 'excellent virtues' of (gift, morality, patience, energy, effort, meditation, concentration of mind, transcendent wisdom, method, skillfulness of means; aspirations, good wishes, strength, vigor, knowledge, learning.); a person must 'go beyond charity' (gift), 'to go beyond wisdom-knowledge.
- When an individual is moved to compassion for another's suffering without volition, then they have gone beyond, and that is the opportunity Mel Gibson's *The Passion of the Christ* affords the Human Race.
- Because the vast dynamic consciousness of the Kingdom of God is within your heart, you have an unlimited source of Spirituality to access.
- There are multiple levels within us; starting with our Divine Spark or Spirit, then there is the Holy Spirit, Christ-Consciousness, three levels of the Higher Self and the Divine Will"
- Jesus' statement that "No one goes to the Father, but by me", was telling us that to reach the individual Spirit or Divine Spark (Father) requires the incorporation of the Christ Consciousness within.
- The battle between the "lower ego" and the "Higher self" does not explain the atrocities perpetrated in the world today.
- Less than 200 years ago it was considered acceptable to enslave another human being.
- Although slavery still takes place in some parts of the world, on the whole most people abhor the practice.

- Within the last two decades, we have witnessed the most barbaric behavior by so-called civilized people.
- The Church says atrocities occur because of the presence of the Devil or Satan.
- White and black are not colors, like blue, green and red.
- White is a combination of all the colors of the visible spectrum of light.
- Black is the absence of that spectrum and, therefore, of white as well.
- White is an integration of all the visible forms of radiance.
- Black is an absence of radiance.
- The color red represents anger and rage.
- Black represents despair.
- Hatred was a result of the insertion of the counterfeit spirit, and the exact opposite to the Spirit or Love.
- The insertion of the counterfeit spirit is what constituted the emergence of evil on the Physical Plane.
- The word hate is used in the New Testament multiple times by Jesus, but Jesus did not mean “hate” in the way we understand it today.
- Another word for hate is forsake, which means to give up (something held dear), renounce, and abandon.
- The Greek language has three different words for Love, *eros*, *philo*, and *agape*.
- Deductive Reasoning suggests as there are three different words for love, there is probably more than one Greek word for the antonym of love, hate.
- Hatred represents a consciousness or atmosphere.
- The first level of hatred would be divided into two parts, with the first part being used in the same context as in the Bible, renounce, or abandon. The second part could also come from the Bible. Only hatred in this context is more akin to intense dislike or abhorrence, as in the beatitudes in Matthew.
- The second level of hatred comes from Sophia’s emotion of Fear, which became the element Water.
- The most hateful acts are perpetrated by individuals who hate a person for the color of their skin or religion. A common term for this behavior is Xenophobia, an intense dislike and/or fear of people from other countries.
- A xenophobe (a person suffering from xenophobia) is a person unduly fearful or contemptuous of that which is foreign, esp. of strangers or foreign peoples.
- Xenophobia comes from the Greek words *xenos*, meaning foreigner, stranger, and *phobos*, meaning fear.
- Fear for the unknown can turn into hatred, which unfortunately often results in violence.
- The most devastating thing that perpetuates xenophobia is the lack of communication between each other.
- We are all influenced by stereotypes we constantly see on TV and in films.
- As this level of hatred derives from a Spiritual emotion, it can be transmuted.
- People can overcome the second level of hatred with knowledge and understanding.
- Although the second level of hatred can result in some atrocious acts, it is not as devastating Spiritually as the third level of hatred, because it is connected to Blasphemy of the Holy Spirit.

- Hatred at the third level is wholly alien to Spirituality, and is the most devastating result of the insertion of the counterfeit spirit, because it involves revenge.
- Vengeance driven hatred is best described by the adjective hateful, which is associated to the synonyms malicious, cruel, spiteful, and wicked or evil.
- The third level of hatred is most odious because of its subtlety. It is associated with the emotion of Grief which became the Element Air.
- Identifying the third level of hatred to Sophia's emotion of Grief reveals the insidious nature of hatred.
- One of the colors of the "spikes" produced from a Hitler rally was black.
- The color people wear when they are in mourning (grief) is black.
- The hatred that is engendered by grief cannot be transmuted.
- The Gnostics believed "Grief" was the source of evil.
- People who are experiencing "grief" are usually barely functioning.
- Loss often leads to the desire for revenge.
- When Ptolemaeus said that the law of an eye for an eye "came from God", he was referring to the Law of Karma or the Wheel of Necessity set up by The Creator/Demiurge to address the "Watchers mistake."
- The law of revenge or an "eye for an eye" is still practiced in parts of the world, namely Saudi Arabia.
- The law of revenge perpetuates the energy, consciousness, and frequency of hatred.
- The real danger of the third level of hatred is that it isn't always obvious but can simmer under the surface for centuries.
- A perfect example of hatred simmering under the surface is the rise of Nazism and Fascism in Italy and Germany.
- When hatred rises to the surface it multiplies, and if an individual is not careful they can find themselves consumed by it.
- Historians have debated for decades how so many millions of Germans could have been convinced to turn a blind eye to the mass abuse of human rights in the 20th Century.
- Hatred (xenophobia) of the Jews was nurtured by the Church.
- Hatred of the Jews had gone unaddressed for centuries.
- Until fairly recently, the Catholic Church held the Jewish nation collectively responsible for Jesus' crucifixion.
- The Second Vatican Council held from 1962 to 1965 repudiated the belief that the Jewish People were responsible for the crucifixion.
- Two Church teachings became the foundation stones for centuries of oppression of Jews by the Church.
- Supercessionism (a.k.a. Replacement Theology) is the belief that because most of the Jews in the first century CE did not adopt the teachings of Jesus, God rejected the Jews, unilaterally cancelled his covenants with them, and now favored Christians as his chosen people.
- Transfer of sin: This is the belief that all Jews, from the first century onwards, are responsible for Jesus' execution circa 30 CE. This includes Jews who lived in the Roman Empire in the first century CE but had never heard of Jesus or of his teachings. It includes Jews who were born in the 19 centuries following Jesus' death.

- Although many Jews formed the Jewish Christian movement centered in Jerusalem, most continued to favor the Torah and the religion of their ancestors that God had called them to honor.
- Under the topic "The Church and non-Christians," the Roman Catholic Catechism now acknowledges the special and irrevocable relationship between God and the Jewish people.
- The Catholic Church does not accept Judaism and Roman Catholicism as equal paths to salvation.
- The Catholic Church teaches that only Catholics can be assured of salvation.
- A church document *Dominus Iesus*, states that members of other religions, including Judaism, are "gravely deficient" relative to members of the Church of Christ who already have direct access to "the fullness of the means of salvation."
- The Second Vatican Council states: "True, the Jewish authorities and those who followed their lead pressed for the death of Christ;...still, what happened in His passion cannot be charged against all the Jews, without distinction, then alive, nor against the Jews of today."
- The Catholic Church was not complicit in the Holocaust.
- The Catholic Church's rigid stance on the Jews served to breed resentment and hatred for them for centuries among believers in Christian countries.
- Many believe the Catholic Church is God's representative on Earth.
- Indoctrination is a powerful influence, and often over-rides Reason.
- Germany was not Catholic, but Protestant.
- The main denomination in Germany is Lutheran.
- The Lutheran rejects Mariolatry.
- The Lutheran Church has a Calendar of Saints.
- The Church's disdain for the Jews translated to the populace, and simmered under the surface of Europe.
- The third level of "hatred" rose to the surface and grew to overwhelm all human decency, tolerance, and restraint in Germany during the 1930s and 1940s.
- Hitler rallies caused "spikes" in the colors red and black, and in all four of Sophia's emotions.
- The "spike" in the color black reveals the presence of the third level of hatred.
- The presence of the color red represents the active/masculine energy that fueled the hatred.
- The world has seen the third level unresolved hatred surface again and again. For example consider the conflicts between Israeli's and Palestine, Sunni and Shiite muslims in Iraq.
- One of the worst modern example of the third level hatred surfacing is the recent genocide against the Tutsi by the Hutus in Rwanda. Then there is the simmering "hatred" in Northern Ireland between the Catholics and Protestants.
- So many individuals simply get swept up in the atmosphere of hatred.
- People who commit "war crimes" or great acts of cruelty are not completely exonerated.
- Before incarnation, advanced Souls chose to incarnate to be a part of the "spikes" in the emotions of Fear, Ignorance, Grief, and Confusion.

- The individuals responsible for the Holocaust and other incidents of genocide are not advanced Souls. We know this because of prophets like Nostradamus, who foresaw the rise of Hitler and Mussolini.
- The instigators of hatred, cruelty, and terror rather than being advanced Souls are the exact opposite.
- The advanced Souls that chose to incarnate into the energy, consciousness, and frequency of WWII were the selfless individuals like Oskar Schindler whose humanity was an example to all.
- There were many advanced Souls in the general population of Germany.
- Most advanced Souls in Germany completed their Spiritual mission through acts of courage and selflessness.
- Everyone living in the atmosphere of the third level of hatred was affected.
- Even advanced Souls could be caught up in the energy, and consciousness of hatred.
- If any individual nurtured hatred for anyone, then they were in danger of being taken over by the emotion. This includes children that survived the war only to find themselves under the iron hand of Stalin.
- The most dangerous aspect of the third level of hatred is the preponderance of burying the emotion beneath the surface. Eventually, the hatred will rise to the surface at the most devastating time unless addressed.
- Even an advanced Soul can be overcome by the third level of hatred and escalate into committing Blasphemy of the Holy Spirit.
- The statement “Blasphemy of the Holy Spirit cannot be forgiven” is directed at the individual and does not necessarily apply to everyone that gets caught up in the atmosphere of hatred; otherwise every German who joined the Nazi Party would be affected.
- All judgment is from the individual.
- Blasphemy of the Holy Spirit” is when an individual betrays his or her Spiritual mission on Earth with full knowledge. The Reason it cannot be forgiven is the Spirit is overwhelmed by the counterfeit spirit and cannot remain in the body and must separate from the individual Soul, and return to *Great Spirit-Mind*. Consequently, when the individual dies there is nothing of the Spirit Life for the Soul to carry with him or her, and everything that made the person an individual will be lost.
- Blasphemy of the Holy Spirit applies to the individual Soul, and those groups of people that get caught up in the energy and atmosphere, are not necessarily lost.
- Groups of people that get caught up in the energy and atmosphere of hatred can be caught in a kind of perpetual loop where they repeat the behavior of hate life after life. This can be understood through reincarnation.
- John the Baptist was the reincarnation of Elijah.
- Israelis and Palestinians are trapped in a closed loop.
- Large numbers of both Israelis and Palestinians are trapped between the past and future. This is tantamount to hooking one end of an elastic band from the “ball” around the past while the other end is still attached to the “ball.” Remember, the ball of elastic bands is still being propelled forward. As the Life Principle and evolution moves toward the end of this round, which is rapidly approaching, the tension on the bands reach critical mass.

- Tragically, if enough of a nation's souls are linked to the past, then the tension can often lead to war and violent conflict in the present.
- It was the Tootsies ability to forgive which nullified the hate.
- Our Deductive Reasoning led us to the answer of how to overcome the 3<sup>rd</sup> level hatred.
- One of the Seven Keys to Love is Forgiveness.
- Love is the opposite to hate.
- Even the third level of hatred is dissipated by forgiveness.
- From a consciousness and energy perspective forgiveness brings light to the black darkness of hate/Grief.
- The Hounds of the Barrier's purpose is to guard the exit out of this cycle.
- The Hounds and the World Soul do not have the same function.
- The World Soul was constituted from the thoughts and emotions of the Human Race.
- At the start of the Common Era the World Soul's role changed.
- After The Christ ascended to "sit at the right hand" the World Soul separated from his baser or lower aspects, which became the prince of this world that entered the Physical Plane, while the purer aspects of the World Soul remained in the Soul Plane.
- The Christ and Sophia did not incarnate into Osiris and Isis "for the sake of balance.
- Both sides or active and passive duality have to be represented, and this didn't happen until the World Soul gained consciousness and could incarnate as Set, the twin brother of Osiris.
- The most disastrous result of the Lemurian interference was that the genetic manipulation affected the entire Soul Plane, because the *Cro-Magnon*'s thoughts and emotions took form and became the World Soul.
- At first the World Soul had no consciousness of its own, but as the ages past it became infused with more and more of the developing Human Race's thoughts and emotions.
- The genetic manipulation, not only caused the creation of the World Soul, but also exposed the inhabitants within the Soul Plane to the lower human emotions.
- Other Archetypes are the "Dwellers on the Threshold" and the "Great Sphinx."
- There is an Archetype that prevents an individual Soul rising progressing or sinking regressing to a different level (threshold) before their time. This Archetype is better known as the famous 3-headed dog Cerberus that guards the entrance to Hades or Hell.
- Animals are territorial and will defend their territory with their lives.
- Liminality is from the Latin word *līmen*, meaning a threshold, is a psychological, neurological, or metaphysical subjective, conscious state of being on the threshold of or between two different existential planes.
- The Limbic System comes from the Latin *limbus*, meaning "border" or "belt".
- A common synonym for both border and belt is limit, which in turn is a synonym for threshold.
- The Great Sphinx according to tradition guarded the entrance to Thebes, and no one could pass by her unless the individual answered a riddle.
- Folklore said that Hera or Ares sent the Sphinx from her Ethiopian homeland.
- The Greeks always remembered the foreign origin of the Sphinx.
- The riddle of the Great Sphinx was "Which creature in the morning goes on four legs, at mid-day on two, and in the evening upon three, and the more legs it has, the weaker it be?" She strangled and devoured anyone unable to answer.

- Oedipus solved the Sphinx’s riddle with the answer, Man—who crawls on all fours as a baby, then walks on two feet as an adult, and walks with a cane in old age.
- By some accounts (but much more rarely), there was a second riddle: “There are two sisters: one gives birth to the other and she, in turn, gives birth to the first.” (answer: day and night—both words are feminine in Greek).
- When Oedipus answered the Sphinx’s riddle, she threw herself from her high rock and died. An alternative version tells that she devoured herself.
- Oedipus can be recognized as a liminal or "threshold" figure, helping effect the transition between the old religious practices, represented by the death of the Sphinx, and the rise of the new, Olympian deities.
- Another liminal figure was the 3-headed hound that guarded the entrance to Hades. For Harry Potter fans, a representation of Cerberus was “fluffy” the Keeper of the Keys, Hagrid’s dog.
- Cerberus is the name given to the entity which, in Greek and Roman mythology, is a multi-headed dog which guards the gates of Hades, to prevent those who have crossed the river Styx from ever escaping.
- The term “Dweller on the Threshold” is found in different places, Mythology, Theosophy, and Hindu, Brahmanism.
- The Dweller on the Threshold refers to an invisible malevolent entity that attaches to a human being. The term was first used by Bulwer-Lytton in his novel *Zanoni*.
- Helena P. Blavatsky affirms that the Dweller is the discarded astral double of an individual in a previous life that may not have fully disintegrated yet when that individual is reborn. Thus the dweller will be drawn to the new incarnated personality due to their affinity. Sometimes this entity is also called Guardian of the Threshold.
- In Brahmanism the Dweller on the Threshold “S’is’u-mâra” is referred to as the hub of the universe.
- S’is’u-mâra literally means the Infant Killer and means the porpoise and is the name of a constellation, in the north, near the Pole.
- S’is’u-mâra corresponds perhaps with the Draco or the Ursa Minor.
- S’is’u-mâra is saluted by all knowers of Brahma, on their way to the Supreme God.
- The Brahman (called Sis’umâram) is free from all passions and parts.
- The Brahman in the highest Golden Sheath (the Cosmic Egg).
- S’is’u-mâra is the highest of Lights; it is that which the knowers of Âtmân know.
- S’is’u-mâra is in the Centre of the Cosmic (as Sis’umâra, the Light of all Cosmic Suns).
- Sis’umâra is even in the centre of our Sun and illumining all planets.
- In the first respect He is meditated upon as Sis’umara and in the second as Gâyattrî.
- In man, the Brahman manifests in the heart or the Auric Egg, called the city of Brahman.
- In the Universe, He manifests Himself in the Cosmic Egg, called the "Golden Sheath." These are the two places where Brahman may be meditated upon.]
- The *Emerald Tablets of Thoth the Atlantean* Tablet 8 has “Far have I been on my journey through SPACE-TIME, even to the end of space of this cycle. Aye, glimpsed the HOUNDS of the Barrier, lying in wait for he who would pass them. In that space where time exists not, faintly I sensed the guardians of cycles. Move they only through angles. Free are they not of the curved dimensions.

- Strange and terrible are the HOUNDS of the Barrier. Follow they consciousness to the limits of space. Think not to escape by entering your body, for follow they fast the Soul through angles. Only the circle will give ye protection, save from the claws of the DWELLERS IN ANGLES.
- Once, in a time past, I approached the great Barrier, and saw on the shores where time exists not, the formless forms of the HOUNDS of the barrier. Aye, hiding in the midst beyond time I found them; and THEY, scenting me afar off, raised themselves and gave the great bell cry that could be heard from cycle to cycle and moved through space toward my soul.
- Only by moving through curves can ye escape them, for in angles they will pursue thee. O man, heed ye my warning; Seek not to break open the gate to beyond. Few there are who have succeeded in passing the Barrier to the greater LIGHT that shines beyond.
- For know ye, ever the dwellers, seek such Souls to hold in their thrall
- The reference to the Animal Souls alludes to a human being overcoming their lower selves to develop their Spiritual Soul and pass by the “animal” Hounds of the Barrier out of this cycle. This is related allegorically with the “Hounds” only being able to track a Soul “through angles”. The saying to “smooth out the rough edges” means to perfect something.
- Smoothing the rough edges” from a Spiritual perspective means “rounding out” or perfecting.
- A circle is considered perfect.
- The Hounds of the Barrier are also an Archetype for a filter to make sure only those of the brightest light Spiritually Evolve to the next level.
- Hatred is the culmination of an apparently innocuous mental process. That process is judgment, which begins the concept of separation.
- Jesus warned us against judgment, saying, “judge not lest ye be judged”
- Judgmentalism of others can lead to hatred and this can lead to atrocious acts under the cloak of righteousness.
- Unresolved hatred can rise to the surface.
- Jesus said that “all sins shall be forgiven” even murder.
- Today the law lacks wisdom because it is rarely unbiased and often creates resentment.
- There are two specific practices of the legal system, which stand out as creating an air of resentment.
- Injustice drives an individual to seek justice, which although part of Spiritual progress, if not tempered with Compassion can lead to the emergence of hatred.
- From a Spiritual perspective we cannot possibly know the consciousness behind any action.
- Some condemned criminals are so consumed with hatred that the individual has caused his higher principles to leave him
- It is predominantly in between incarnations that the law of Karma or justice is played out, not always in our next incarnation.
- The families of the victims of violent crimes can know that no one can escape their just desserts.
- Hatred that is directed to the murderer has two very detrimental effects. First, the hatred takes on a life of its own in the astral plane. Second, the individual who is the hater lowers

their vibration to such an extent that the love of God cannot penetrate their heart to heal and comfort them.

- It only takes an instant for someone to see the light of God and be transformed. Such a rehabilitated individual may one day help to prevent someone else from destroying another life.
- The church teaches that the unsaved executed convicted killers (those who have not accepted Jesus Christ as their savior) will eventually experience the outer darkness. That will depend on whether or not the condemned has made peace with himself.
- It is not *Great Spirit-Mind* that determines where we go.
- Outer darkness that Jesus warned of is existence without Love.
- Outer darkness is total isolation from our true natures.
- It is important to not take the reference to outer darkness literally.
- The goal of Spiritual Evolution is to progress Spiritually.
- Taken from an energy perspective, what appears as judgment is a means to transmute Sophia's emotions.
- The presence of hatred is wholly opposed to anything Divine as it is the opposite to love.
- "The *Know Thyself Initiative* is one of the means the Divine forces are using to help Humanity.
- The particular 777,000 individuals we are looking for contain the exact frequency of consciousness that will act as a vehicle for the catalyst of compassion.
- The individuals involved have chosen to incarnate at this time for this specific reason.
- Everyone born between 1945 and 1983 are potential members.
- Most members of the two generations concerned will fulfill their purpose in other ways. A very small percentage will become the catalyst for compassion through the *Know Thyself Initiative*.
- The Triple 7 Center's mission is to facilitate the remembrance or awakening of the 777,000 by making The Mysteries accessible for them.
- Through the *Know Thyself Initiative*, The Mysteries, which the participants are subliminally conscious of, will affect their awakening to their purpose at this time.
- The Divine forces know that for most people to change the way they think is near impossible. That is why so small a number of individuals are required to act as a catalyst.
- Essentially, the Initiative is an energy and consciousness phenomena.
- One of the goals of the Initiative is to help you create new pathways in your brain. As stated this is not brainwashing; on the contrary, it is brain expansion, which helps to access Universal information that we have forgotten. The books by Eckhart Tolle and our associate Dr. Jill Bolte Taylor are invaluable in demonstrating how this process is possible.
- Mr. Tolle approaches it from the perspective of disciplining the mind to stay in the present. He also makes us aware that our thoughts are not always our own.
- Dr. Jill's gift is in her sharing of her experience of the Universal Collective Mind, where perfect clarity and peace is achieved. In Dr. Jill's words Nirvana.
- We do not need to experience a stroke to achieve Nirvana. Ultimately, it begins with recognizing the "way" you think as well as "what" you think.

- The Ancient Wisdom taught in The Mysteries how to achieve a heightened state of awareness and re-route the pathways in the brain by changing the way the candidates thought.
- Only a very few exceptional individuals were able to successfully reroute the pathways in their brain.
- Greg Braden and many others have discovered that the consciousness of both Humanity and the planet has expanded and is moving into sync with each other.
- Now the Human Race can be affected on many levels through sound and color.
- Because of the harmonizing of both the planet and human consciousness, there is an opportunity or “portal” to facilitate the transmutation of matter, which includes the Earth as well as our physical bodies. With 777,000 collectively doing this, they create a critical mass shift, which causes the rebalancing of the active/masculine and passive/feminine energies.
- It isn't necessary for everyone who joins the Initiative to complete it.
- The truth is we are merely the facilitators. Only we know our role.
